Resources for Grant Writing  
prepared April 12, 2017

Finding Funding for Research and Training

1. Grants.gov
   - Resource for ALL federal funding
   - Subscribe to email alerts

2. NIH-specific tools
     - About Grants – great resource for all information about NIH grant applications, all levels, all funders
     - Finding Funding – searchable database of active and archived funding opportunities from many government funders, not just NIH (easier to search than grants.gov but not as inclusive)
   - Examine individual NIH Institute / Center websites to find funding for research and training opportunities from that funder, learn their priorities
     - Sign up for e-Newsletters
   - Fogarty International Center’s searchable funding database to locate international funding opportunities - Funding Opportunities [http://www.fic.nih.gov/Funding/Pages/default.aspx](http://www.fic.nih.gov/Funding/Pages/default.aspx)
   - NIH RePORTER tool to review others’ research abstracts and see which NIH I/C funds what areas of research and training [projectreporter.nih.gov/reporter.cfm](http://projectreporter.nih.gov/reporter.cfm)
     - Allows you to “search a repository of NIH-funded research projects and access publications and patents resulting from that funding”.
     - Examine published abstracts of funded NIH research at RePORTER to see how others in your field describe their Specific Aims – these are typically repeated in the Abstract, which can be searched here.

3. Grant Forward [www.grantforward.com](http://www.grantforward.com) (need net id to use this)
   - Search for grant opportunities, save and share your query, and sign up for email alerts
   - Search on all kinds of key words: Cancer, Diabetes, Small grants, Bridge funding, Disease association clinical funding opportunities, Travel and conference awards/competitions

4. Foundation Directory Online - [www.healthlibrary.emory.edu/Databases, Foundation Directory](http://www.healthlibrary.emory.edu/Databases, Foundation Directory) (need net id to use this)
   - Searches on broad biomedical search terms, diseases, or any “text” word
   - To search for which foundations fund your ideas/criteria “Search Grantmakers” (not “Search Grants”)
   - Very rich database for private foundation funding

5. Trialect [www.trialect.com](http://www.trialect.com) Global platform for health professionals; access to grants, fellowships, courses, observerships, etc.

6. Disease and Professional Association websites and listserves – look for Funding and Career Development tabs, sign up for newsletters and email alerts for funding opportunities

7. Google – Intuitive ‘no rules’ searching: Type in just what you are thinking -
   - Who funds gynecological epidemiology research
   - Reproductive epidemiology grants fellowships
   - Career Development Award pulmonary
   - Travel scholarships epidemiology
   - Young Investigator HIV
### NIH Technical Grants Resources

**Annotated NIH Forms** (or, a step by step guide to answer every question on the NIH application forms)

**Forms Library**

[https://grants.nih.gov/grants/forms.htm](https://grants.nih.gov/grants/forms.htm)

---

### EMORY Resources for Funding and Carrying Out Research

- **Health Sciences Library**: Databases @Emory
- **Laney Graduate School**: [http://www.gs.emory.edu/sites/grantwriting/](http://www.gs.emory.edu/sites/grantwriting/)
- **Office of Sponsored Programs**: [http://www.osp.emory.edu/funding/Internal.html](http://www.osp.emory.edu/funding/Internal.html)
- **School of Medicine**
  - Office of Postdoctoral Education – K tutorial series (offered 3x/yr) - [https://med.emory.edu/postdoc/CurrentPostdocs/Funding/index.html](https://med.emory.edu/postdoc/CurrentPostdocs/Funding/index.html)
  - Office of Faculty Development - [http://med.emory.edu/faculty_dev/research/grant-funding-info.html](http://med.emory.edu/faculty_dev/research/grant-funding-info.html)
  - Department of Medicine Consult Program - [http://medicine.emory.edu/research/internal-research-resources/index.html](http://medicine.emory.edu/research/internal-research-resources/index.html)
  - Emory Integrated Core Facilities [http://www.cores.emory.edu/](http://www.cores.emory.edu/)
  - ACTSI
    - Funding Opportunities [http://www.atlantactsi.org/funding/index.html](http://www.atlantactsi.org/funding/index.html)
    - Education and Training [http://www.atlantactsi.org/training/index.html](http://www.atlantactsi.org/training/index.html)
    - MSCR degree program
    - TL1 scholarship
    - KL2 Career Development Award for junior faculty
    - Certificate Program in Translational Research
    - Research Resources
    - “Studio” Consultations
