EMORY SCHOOL OF MEDICINE DEAN'S OFFICE

4.7.20

TOP STORIES

Message from Dean Sukhatme | Thank you to our students, residents, fellows, staff and faculty for your extraordinary work during this challenging time. I hope you'll join me for a brief address on **April 16, 2020 at noon**. An outlook calendar invitation and Zoom link will go out to all SOM. The event will also be recorded and posted for on-demand viewing. Questions for me? Email them to OfficeofSOMDean@emory.edu.

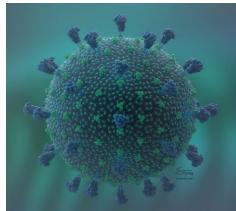

Emory and Georgia Tech team up on rapid production of face shields | With supplies of medical personal protective equipment (PPE) strained amid the COVID-19 outbreak, a cross-disciplinary team at Emory Healthcare and the Georgia Institute of Technology is working on a new effort to supply thousands of face shields to health care professionals on front lines in the fight against the virus. (Watch the video below.)

Reminder: Imagine, Innovate and Impact Awards - I³ Education and I³ Venture proposals due April 15 | To be considered for I³ Education Awards, proposals should highlight, promote, and disseminate innovations in medical education and training (degree programs and GME). To be considered for I³ Venture Awards, proposals should catalyze promising early-stage

concepts with commercial potential that do not yet qualify for funding from external sources. [Learn more.](#)

OPERATIONAL UPDATES

COVID-19 Updates: Visit the [School of Medicine's COVID-19 Communications](#) web page for the latest updates and links to key resources.

FACULTY DEVELOPMENT

All faculty development opportunities will be available by Zoom only.

April 8: Rapidly Scaling Telehealth in Response to COVID-19, hosted by AAMC, at 4 p.m. ET. Leaders from the University of Virginia and Oregon Health & Science University will share their experiences in deploying resources to dramatically scale up telehealth capacity throughout their health systems. [Register](#).

April 16: Integrated Imaging Core - Cool New Techniques, noon to 1 p.m. Core Director Neil Anthony will provide an update on new techniques including light sheet microscopy, super resolution microscopy and deep learning in fluorescence microscopy. [Register](#).

April 22: Why is it Hard to do Good Science?, 5:30 to 6:30 p.m. “Good science” means answering important questions convincingly, a challenging endeavor under the best of circumstances. Ray Dingledine will close out this year’s SOM lecture series with a virtual session on why “good science” is so hard to do. [Register](#).

April 27: Financial Management and Research Administration, 1 to 4 p.m. The Researcher Survival Skills series continues virtually with a session presented by Liz McCarty and Amelia Randall. [Register](#).
