

Emory University Department of Gynecology and Obstetrics Educational Conferences

General

The Department endeavors to provide an excellent educational experience for our residents. We know that much learning occurs during clinical experiences, such as seeing outpatients or performing surgeries. We also realize that didactic lectures and conferences offer an integral part of increasing a resident's knowledge base. Therefore, dedicated time is set for these lectures and conferences. Attendance at these meetings is mandatory, and attendance is taken. The Wednesday morning Grand Rounds and Didactic conference time is **protected** time, and the resident is relieved of clinical duties during this time to attend these conferences unless otherwise specified or by approval of the Program Director.

Title	Purpose	Frequency	Location	Target Audience
Combined Neonatology and Obstetrics Conference	Improve patient care by reviewing all ultrasound detected fetal anomalies at Grady Memorial Hospital and Emory Midtown and formulate intrapartum and newborn management plans jointly with obstetrics and neonatology	Monthly	Grady	Faculty Fellows Residents
