Chair's corner

Welcome to the Fall 2025 edition of the Human Genetics Dispatch. This letter, our department's way to stay in touch with our alumni and friends, is a chance to share the latest news about our faculty, students, and staff. Because of the many exciting events, discoveries, and achievements we've had to report, we've added two extra pages to this issue. We hope you enjoy reading about the many ways our department is making a difference in genetics research, education, and patient care.

In particular, the Department of Human Genetics is proud to announce the launch of the Human Genetics Alumni Advocacy Committee. This group will help us stay connected to our graduates, support our students and trainees, and strengthen the relationship between our department and the broader genetics community. We're excited to work with this committee to build a vibrant network that can support our mission in many ways.

We're also pleased to welcome Amy Hamilton Jones to the role of Chair of the Department of Human Genetics Alumni Advocacy Committee. Amy graduated from our Genetic Counseling program in 2010 and has since built a career in clinical genetics and public health. She is currently the Director of Genetic Counseling at Emory Healthcare and an Associate Professor in the Department of Human Genetics at Emory University School of Medicine.

Amy is joined by Committee Vice Chair Jessica Mitchell (Genetic Counseling, 2012), Committee Secretary Jessica Lee (Genetic Counseling, 2018), and Committee Treasurer Jeffrey Kahn (Genetic Counseling, 2015). Together, they bring a wide range of experience in clinical practice, research, education, and leadership.

Finally, I'd like to thank Dr. Elizabeth Worthey for her dedicated service as Chair of the Department of Human Genetics Alumni Advocacy Committee. Her leadership helped lay the foundation for this group, and we're grateful for her continued support as she transitions to a new role.

Thank you for reading this issue. Stay tuned for updates on the Alumni Advocacy Committee's activities, and please reach out to us with your ideas and feedback.

Sincerely,

Peter Visscher

People on the move

Welcome to the Department of Human Genetics's newest faculty members, **Alexa Bernardi** and **Jonathan Sebat**, who joined the department in January 2025. Dr. Bernardi's research focuses on the genetic basis of neurodevelopmental disorders, with a particular interest in the role of rare variants in autism spectrum disorder. Dr. Sebat's research focuses on the genetic basis of neurodevelopmental disorders, with a particular interest in the role of rare variants in autism spectrum disorder.

Dr. Bernardi received her PhD in Genetics from the University of Michigan and completed her postdoctoral training at the Broad Institute of MIT and Harvard. Dr. Sebat received his PhD in Genetics from the University of Michigan and completed his postdoctoral training at the Broad Institute of MIT and Harvard.

Dr. Bernardi's research is focused on the genetic basis of neurodevelopmental disorders, with a particular interest in the role of rare variants in autism spectrum disorder. Dr. Sebat's research is focused on the genetic basis of neurodevelopmental disorders, with a particular interest in the role of rare variants in autism spectrum disorder
