DESCRIPTION:

Pocket-sized comprehensive food list for patients with Phenylketonuria. This self-explanatory book on the Phenylalanine (Phe) Exchange system contains information on foods found in the Amino-Acid Analyzer, a computer program used by dietitians to analyze Phe content. Information on household measurements and serving sizes, calories, grams of protein, Phe content, and Phe exchanges is provided in ledger format. Also included are sub-lists of common foods, room to compile a favorite food log and keep notes, and helpful resources. A great quick reference of a wide variety of foods.

Shipping included in cost of booklet
