Outstanding Scientific Citation Awards

To recognize researchers producing outstanding research publications in both the basic and clinical/translational research areas at the following faculty ranks:

- Instructor/Assistant Professor
- Associate Professor

**Deadline:** More information will be available soon.

**Eligibility:** All regular faculty (Instructors, Assistant Professors and Associate Professors) with a primary appointment in the Department of Medicine of Emory University are eligible who have *not received* this award during the previous 3 years.

**Nominations:** Investigators must submit a peer-reviewed original research publication on which they are the first or last author. The associated manuscript must have been published or accepted for publication between May 1, 2019 and May 1, 2020. Only one entry/publication per nominee will be accepted for review. For works involving multi-site clinical trials, the nominee must be first or corresponding author, or have held a significant position on the development, steering, or writing committee. For both basic and clinical/translational research awards, a significant portion of data acquisition must have been performed at Emory. Nominations can be self-made or made by other eligible faculty.

**Submission:**

- Narrative of significance of publication (include the role of the nominee on the study and a description of the work performed at Emory; 5000 character limit)
- Manuscript in PDF

**Decision:** Will be made by an independent committee composed of Emory faculty outside the Department of Medicine. This committee is assembled from a wide variety of medical and scientific fields. Manuscripts will be judged on impact and the more universal standards of adherence to scientific method, clarity of writing, quality of methods and statistics, and significance of results.

**Award:** The award includes a commemorative plaque and will be awarded during “Celebration of Faculty Honors and Awards”. More information will be available soon.
