

THE REACCTION STUDY

Did you know that your heart and brain are interconnected? Stress can affect both. We are studying if the way your heart reacts to stress may be related to cognitive function.

Participants will:

- ♥ Have 1 or 2 visits to the study center
- ♥ Complete a set of questionnaires
- ♥ Undergo a memory evaluation and have their heart response to mildly stressful conditions measured
- ♥ Be compensated for their time and effort

Volunteers needed

- ♥ 25 years or older
- ♥ with and without memory problems
- ♥ African American or white participants
- ♥ A diagnosis of early-stage dementia is allowed
