**IMPORTANT: Zoom Screen Sharing Default Setting Change**

Faculty and Administration,

I have been informed that Zoom made a change to FREE accounts this past weekend that impacted a screen sharing setting in Emory's enterprise accounts.   Please note that this would only impact Zoom meetings with colleagues. It does not impact Webinars (Grand Rounds, Biology of the Eye, and TMDS).

Emory originally had the setting for screen sharing enabled globally for "All Participants".   After the Zoom change this weekend, user's accounts have been changed to "Host Only".   The "Host Only" setting means that only the host can share a screen during a meeting.

I recommend making the following change in your Zoom account if you want to have the option to host collaborative meetings where attendees can also share their screens.

1. Log into https://emory.zoom.us

2. Click on Settings
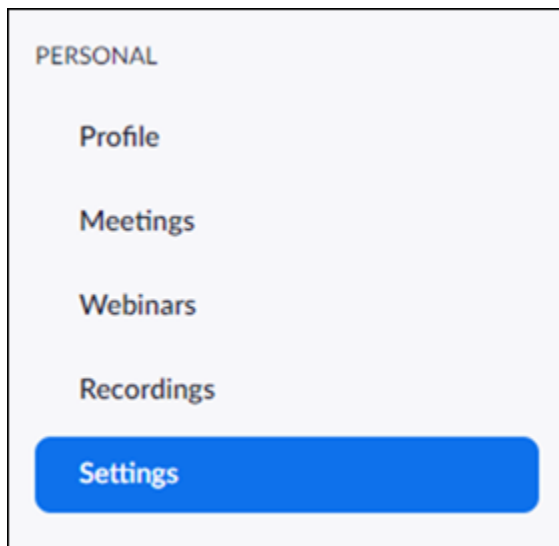

3. Click the "In Meeting (Basic)" sub-menu, click "All Participants" under **Who can share?**, and click Save
