

AN EXCITING WAY TO LEARN

# SUMMER SCIENCE

EMORY  
UNIVERSITY  
SCHOOL OF  
MEDICINE

# ACADEMY 2020

The Summer Science Academy offers exciting and engaging hands-on experiences for entering 9th and 10th grade students with an interest in the sciences: biology, medicine, healthcare or related STEM fields. The Academy will take place at the Emory University School of Medicine where you will experience clinical skills training, on and off campus field trips, and heightened awareness of health professional careers in science.

## Core Beliefs:

- Science is all around us and a vital part of our lives.
- All students are able to learn sophisticated principles of science and should be encouraged to enroll in science courses in high school.
- Science knowledge is achievable for students from underrepresented minority backgrounds (African Americans, Hispanic, Native Americans, and Pacific Islanders).
- Students who are female are capable of and should be encouraged to enroll in science courses and pursue careers requiring a background in science and technology.
- With many other career options available, the number of African American and Hispanic American males in science related fields is dwindling. Male students from these backgrounds should be encouraged to pursue careers in science and technology.
- It is OK to be smart and be a high achiever, especially in the science, math, and technology areas.

## Offering 3 sessions:

Session A - June 1 - June 12

Session B - June 15 - June 26

Session C - June 29 - July 10

### Tuition:

\$825

\$225 deposit due with registration. Full balance must be paid by May 4, 2020.

### Online Applications open:

January 6, 2020

\*Registration will be accepted until spaces are filled. Any registrations made after May 4 must be paid in full.
