

## Wendy Baer, MD

### **Introduction:**

I am an Associate Professor; Vice Chair of Wellness for HMO (hematology medical oncology at Winship Cancer Institute (WCI)); and Director of Psychiatric Oncology at WCI. I split my time between administration, clinical care, and teaching.

### **Area(s) of expertise:**

The focus on my work has been clinical care for people dealing with cancer diagnosis, treatment and survivorship challenges. I teach residents and fellows, both in psychiatric oncology but also cognitive behavior therapy in the medical setting. My work in wellness is focused on health care professionals, bringing attention to self care practices and systemic factors that contribute to burnout.

### **Relevant personal details:**

I like to be outside for exercise and wellness. My siblings live all over the country but I wish our jobs were in the same town. I appreciate community building through parenting, both humans and dogs.

### **Approach to mentoring and availability:**

I'm available for short or long-term mentoring needs and am happy to speak about personal and professional goals.
