

Jennifer (Jenni) Stevens, PhD

Introduction:

I am an Associate Professor in the Department of Psychiatry and Behavioral Sciences. I am Co-Director of the Grady Trauma Project and Co-Chair of the ENIGMA Consortium's PTSD working group. I am one of several research-focused PIs within the Grady Trauma Project.

Area(s) of expertise:

My areas of research focus on the neurobiology of trauma, and functional and structural MRI neuroimaging, and harmonization across multiple sites or laboratories. My current work focuses on how traumatic stress impacts women's brain health and identifying early post-trauma risk factors for future chronic trauma-related psychopathology.

Relevant personal details:

I am a mom of 2 elementary-school aged boys, and glad to talk about boundaries and balancing work and family.

Approach to mentoring and availability:

My mentoring approach is tailored to the individual. I am open to consult on professional development for research-focused faculty.
