

Daily Overview (April 10, 2020)

Intense work is underway preparing for predicted volume surges related to COVID-19.

Safety:

- EHC Care Model Team continues working to improve communication around patients on isolation.

Methods:

- Team is documenting processes for VQ scans on C+ and PUIs.
- Work is ongoing to expand IWS coverage and communication, including Grady.

Equipment:

- For those with home workstations: please continue to place tickets with 8-HELP as issues arise. The Teams channel is a resource to receive information, not for ticket submission.
- Reminder: High touch surfaces should be wiped down after every patient.

Supplies:

- Greg Hill is working with supply chain to source N95 masks for those who are having issues with ferromagnetic components. If your MRI team is experiencing an issue with pulling, please let your leader know.

Staffing:

- We are finalizing metrics and staffing contingencies for anticipated volumes surge conditions.
-

Your Wellness Committee:

This weekend, two major holidays coincide. COVID induced loneliness and isolation may be amplified by the cancellation of family gatherings and rituals. Try to connect with friends and loved ones, and check-in with colleagues. If you are struggling, please take advantage of the many support resources available through Emory.
