

Daily Overview (April 13, 2020)

We continue to prepare for surge conditions related to COVID19.

Safety:

- EHC Care Model Team continues working to improve communication around patients on isolation.

Methods:

- Working through an issue with outpatients showing up on the weekend at Clifton for imaging appointments. It seems that some patients continue to receive reminder messages, despite several confirmations they have furloughed the program. Team is working on tracking down more information.
- EHC is working towards a process where patients with scheduled surgery or image-guided procedures will be tested prior to their appointment and asked to self isolate until their procedure is completed.

Equipment:

- Reminder: High touch surfaces should be wiped down after every patient.

Supplies:

- Current supply levels are holding steady at sufficient levels. Please continue to follow recommendations for distributing and storing PPE.

Staffing:

- We are finalizing metrics and staffing contingencies for anticipated volumes surge conditions.

Announcements:

- While the adjudication process continues, the current stability in patient volume is allowing for an increase in procedures. Teams may notice an increase in time

sensitive surgeries and image guided procedures in the coming week.

COVID Town Hall at **8:00 am** on Wednesday, April 15.
