

Daily Overview (March 20, 2020)

We continue to adjust staffing to changing clinical needs, and are coordinating across sites to best triage and prioritize patients.

Clinical Care:

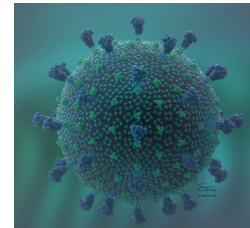

- We have enacted a coordinated team approach across Emory sites to reschedule outpatient diagnostic imaging studies in conjunction with referring services. Our diagnostic radiology residents are helping with these efforts.
- We are adjusting outpatient imaging hours of operation to match decreasing demand and will coordinate efforts to consolidate outpatient operations.
- Our IR, Nuclear Medicine, and Breast Imaging specific teams continue to work on prioritization and rescheduling of patients.
- Tailored portable ultrasound examinations and algorithms for recommended imaging of COVID-19 positive patients are being generated.
- We are finalizing plans for specific allocation and deployment of 30 additional EHC and 15 additional Grady remote interpretation workstations.

Clinical Staffing:

- Clinical divisions continue to monitor imaging workloads and adjust staffing accordingly.
- Interventional Radiology has initiated a new staffing model to best meet the demands of the current crisis.
- Michael Street and Peavine Parking Decks on the Clifton Campus have been made available for additional healthcare staff needs.

The Department of Radiology and Imaging Sciences is closely monitoring the COVID-19 outbreak; and has developed a website to provide additional information and resources to the department's faculty, trainees, and staff.

We thank all Emory Radiology for your hard work, professionalism and dedication through this very difficult situation.

Thank you for all you do!
