

### Daily Overview (March 27, 2020)

We continue with work to improve our internal processes and planning for the upcoming weeks.

---

#### Safety:

- We acknowledge that variation in recommendations for PPE between institutions is contributing to some confusion and anxiety from our faculty and staff.

#### Methods:

- We continue work on refining our approach to scheduling and rescheduling outpatient imaging.

#### Equipment:

- Several additional Emory, Grady, and CHOA radiologist home interpretation workstations have been deployed and work on deployment continues.

#### Supplies:

- Additional sources of PPE continue to be explored and additional shipments are arriving for use.

#### Staffing:

- A survey to catalog clinical skill sets for clinical faculty, fellows, and residents has been sent out. This is to plan for surge conditions and redeployment based on skillset if the need arises.
- 

#### A Tip From Your Wellness Committee:

Tips on Isolation from Scott Kelly retired NASA Astronaut:

1. Follow a schedule
2. Pace yourself and take breaks
3. Have a consistent bedtime
4. Go outside and move
5. Try a new hobby

Many of us have been working remotely for a full two weeks.

Please remember, there are several resources to assist individuals while working remotely. [Click here.](#)

---

### [Radiology COVID Command Center Web Page](#)

The Department of Radiology and Imaging Sciences is closely monitoring the COVID-19 outbreak; and has developed a website to provide additional information and resources to the department's faculty, trainees, and staff.
