Student Health

The health and well-being of Emory students is a top priority and essential to student success. While we encourage self-care, health promotion and prevention, medical students are not exempt from having physical and/or mental illness.

All students are expected to take responsibility for maintaining personal wellness by utilizing the multiple resources at Emory outlined below and notifying the dean’s office when personal health becomes a concern.

Emory University Student Health Services (EUSHS) and Counseling and Psychological Services (CAPS) supports and empowers each student to embrace and prioritize their physical, mental, and social health, and overall well-being to complement their academic mission and achieve lifelong success. Through evidence-based, exemplary care, we are committed to providing innovative, compassionate, multicultural and trauma-informed services to our diverse student body. For our community, we serve as public health stewards to ensure appropriate support and resources during times of need. Emory University Student Health Services is very proud to be fully accredited by the Accreditation Association for Ambulatory Healthcare, Inc. (AAAHC). The Emory Counseling and Psychological Services’ (CAPS) Psychologist Training Program is fully accredited by the American Psychological Association (APA).
